### COLLEGE PROFESSORS

#### Talk of Foods.

The New York papers recently contained a long account of the so-called discovery of a celebrated professor in one of the leading universities. The "discovery" related to a new and successful way of treating wheat and barley to prepare the starchy part by dry baking so it would be made more digestible and nutritious. Thereupon Prof. Livingston, commenting on the discovery of the other professor, says: "A discoverer who was a business man first and a scientist afterward found that such foods could be made more digestible and nutritious by dry baking instead of boiling in water, and has already placed on the market the food which he discovered prior to Dr. H. C. Hays. This refers to Grape-Nuts, the most scientifically made food known. Grape-Nuts can be easily digested by babies and young with a weak stomach, and the food contains the most powerful rebuilding element known in nature, the phosphorus of the building of the brain and nerve centers. It is a delicious food, requiring no cooking, but ready for instant service just as it comes from the package. A recipe book free in each package describes many delicious dishes made from Grape-Nuts."
